SalePoint, Inc. announces Visa's U.S.A Cardholder Information Security Program (CISP) validation.

FOR IMMEDIATE RELEASE.

Sacramento, California - January 18, 2007

SalePoint, Inc., a software company providing leading solutions in specialty retail, healthcare and higher education, today announced it has successfully met Visa USA's rigorous Cardholder Information Security Program (CISP) Payment Application Best Practices validation process. SalePoint has received validation for J-Point, a leading point of service solution, and Trovato, a proven point of sale solution.

Paul Streicher, President of SalePoint, stated, "The validation by Visa shows SalePoint's commitment to maintain the highest level standards for our customers. Our development team has worked diligently to meet the requirements, and to provide the best solutions in our respective industries."

Visa developed CISP (cardholder information security program) to ensure protection of sensitive cardholder information through all phases including collection, transmission and storage. The CISP payment application best practices establish a set of 13 best practices designed to protect sensitive information from being compromised.
